

Teaching Our Kids About Conservation and the Environment

The Port Authority of New York and New Jersey has created engaging virtual sessions for teachers, parents, schools and libraries, to educate children about environmental topics affecting the earth and our bistate region.

We are observing Global Recycling Day, World Water Day and Earth Month to introduce students to water conservation basics and recycling and zero waste practices.

RSVP HERE:

APRIL 6 –7 (NJ)

APRIL 13 –14 (NY)

The programs feature two virtual, interactive 1.5-hour sessions. Requirements include access to simple household items for projects and demonstrations. Additional details and supply list will be shared with registrants.

ZEROING IN ON WASTE

The basics of trash, recycling, composting, and zero waste are covered. Students learn how the transportation sector can create positive solutions to reduce waste and what the Port Authority is doing to reduce waste in our region.

SAVING OUR WATER

Students learn global and local water conservation practices, what they can do to make a difference at home, and what the Port Authority is doing to conserve water through programs and redevelopment water conservation efforts.
